WHITE OAK LIVESAWN CLEAR

For the Maine Traditions Rangeley Collection, we have employed the centuries-old live-sawing technique to produce solid flooring with distinctive style and exceptional character for today's homes. Live-sawing is actually the oldest, most traditional method of cutting lumber, but its popularity waned in North America as much as a century ago. Now, Maine Traditions has adapted this time-tested technique to create our Rangeley collection of floors.

In simple terms, when we live-saw a log, we start at the top, and work our way down. This results in a natural mix of boards - plain sawn first, then rift sawn, and finally quarter sawn boards nearest the middle of log.

The live-sawn method incorporates all of the natural character of the tree from which it was cut - showcasing the full spectrum of color and grain variations, including knots, checks, pith and intriguing mineral streaks.
